

**Information Managed by  
Mambo Direct**

Mambo Direct use the technology of Tharstern Primo V5 to manage all information within the company, along with Tharstern's fully integrated scheduling function.

Our Pre-press department also use Kodak Prinergy System allowing us to manage the workflow through each department efficiently.

**Originated by  
Mambo Direct**

Pre-press is both PC & Mac enabled allowing us to receive any file format and accurately edit any alterations that may occur with customer supplied artwork.

All hi-resolution proofs are prepared with our Epson 9900 proofing machines, along with all low-resolution proofs which are prepared through our 9800 proofing machines. Working with Fogra 39 standards, calibrating when out of tolerance immediately.

Ensuring we manage all sensitive data efficiently, we utilise our own bespoke FTP system; Remote Access with SSL Certification. As well as Remote Access, Mambo Direct also use WeTransfer allowing files to be transferred between us and the client quickly and efficiently.

**Printed by  
Mambo Direct**

We have two presses available for all uses at Mambo Direct, all of which are linked to Heidelberg Image Control:
